EXPERIENCE

Bponi Ltd., Dhaka — *Software Engineer*

Business Digitalization Solution

Contributing to the development and scaling of Bponi's digital business solutions—including Bponi Store, Bponi Khata App, and Amar Travels. Responsible for implementing client-specific features, resolving bugs, and enhancing both frontend and backend functionalities to support thousands of entrepreneurs across Bangladesh.

May 2025- Present

Tech Stack: Rust, GraphQL, PostgreSQL, Vue, TypeScript, Nuxt, and TailwindCSS

Moveon Technologies Ltd., Dhaka — *Software Engineer*

Cross-Border Trade Platform

Developed dynamic features for a cross-border trade platform using React, Next.js, and TypeScript, improving user engagement. Collaborated with backend teams using Laravel to integrate APIs, ensuring seamless data flow and user experience.

September 2022- June 2023

Tech Stack: React, Next, TypeScript, Laravel, AntD, TailwindCSS

Return Trip Ltd., Dhaka — *Software Engineer*

Car Rental Application

Contributed to front and backend development of the Return Trip BD car rental application using Vue, Nuxt.js, TypeScript, and Laravel. Improved the booking experience, integrated push notifications, and optimized core features, increasing user retention. Developed and maintained the CI/CD pipeline to streamline deployments. Collaborated with backend teams to integrate APIs, ensuring seamless vehicle availability management, booking flow, and real-time updates for customers.

August 2022 - December 2023(part-time)

Tech Stack: Vue, Nuxt, React Native, Laravel, TailwindCSS, BootStrap

Bit Byte Technologies Ltd., Dhaka — *Software Engineer*
Software Company

At Bit Byte Technology, I contributed to multiple projects, including e-commerce platforms, advertising agencies, crowdfunding applications, social media platforms, and tours and travel agency applications. I worked on both frontend and backend development using various technologies such as PHP, Laravel, Nuxt.js, Vue.js, jQuery, Bootstrap, and CSS. My contributions spanned from designing user-friendly interfaces and improving customer experience to optimizing backend processes for seamless data handling and integrations. I played a key role in delivering dynamic, responsive, and high-performance applications that met client needs and business goals.

January 2021 - June 2022

Tech Stack: Vue, Nuxt, TailwindCSS, jQuery, Laravel, Bootstrap etc.

EDUCATION

Shahjalal University of Science & Technology, Sylhet — *BSc. in Mathematics*

January 2013 - August 2017

Notre Dame College, Dhaka

June 2009- May 2011

PROJECTS

Flipper — *One of the leading e-commerce, re-commerce platform*

Contribution:

- Contributed to both frontend and backend development of the platform, ensuring smooth and efficient user experiences.
- Implemented dynamic features and optimized the UI/UX for improved customer interaction.
- Worked on integrating payment gateways, inventory management, and product listings, ensuring seamless backend functionality with Laravel.
- Improved performance and responsiveness using Vue.js and Nuxt.js to enhance the frontend experience.

Technology: Vue, Nuxt, Laravel, PHP, jQuery

Return Trip — *Car rental service*

Contribution:

- Led both frontend and backend development, working on key features for the car rental platform, such as booking flow and user

management.
- Developed and maintained push notifications and integrated them for real-time updates on bookings.
- Worked on building and optimizing the CI/CD pipeline to streamline deployment processes.
- Collaborated with backend teams to integrate APIs, ensuring efficient data handling and real-time updates for customers.

Technology: Vue, Nuxt, React Native, TailwindCSS, TypeScript, Laravel

[Moveon](#) — *Cross-border e-commerce trade*

Contribution:

- Contributed to both frontend and backend aspects of the platform, enhancing the e-commerce experience for cross-border trade.
- Built responsive UIs with React and Next.js, ensuring seamless navigation and improved user engagement.
- Integrated complex data flows using Laravel to ensure smooth backend operations for order processing, inventory management, and payment systems.
- Worked on optimizing performance and responsiveness across both frontend and backend to support international transactions and global users.

Technology: React, Next.js, AntD, Tailwind, Laravel.
